ATTILA LAZAR

Bilingual Resume | EN Version

Full-Stack Web Developer | AI Workflows | Digital Solutions Architect

- Web Engineering
- AI Workflows
- SEO + Conversion
- Admin Systems

Professional Summary

Full-stack digital builder focused on web engineering, AI automation, and high-conversion business systems.

Experience

Founder & Digital Architect
2018 - Present

LOrdEnRYQuE | Advanced Digital Solution

- Build premium websites, web apps, AI workflows, and business MVPs that clients can test immediately.
- Design admin-first systems for editing pages, sections, assets, forms, and campaign content in-house.
- Delivered QR/NFC solutions (uTraLink): dynamic vCards, BioLinks, and business profiles with live updates.
- Increase lead quality through conversion UX, structured SEO, and measurable funnel instrumentation.

Freelance Web Developer & IT Specialist
2010 - 2017

Client projects across local businesses

- Built and maintained websites and platform features across multiple industries.
- Handled server setup, deployment workflows, and iterative release improvements.
- Built strong practical foundation in PHP, MySQL, JavaScript, and client delivery.
