PROFILE SUMMARY

I build websites, web apps, AI workflows, and business MVP systems that clients can test immediately. My stack combines engineering, design thinking, and automation for practical, measurable outcomes.

KEY IMPACT METRICS

End-to-End Delivery
Concept to deployment with one accountable owner.

Conversion Focus
SEO-aware pages with CTA and analytics wiring.

AI Integration
Automation workflows that reduce repetitive operations.

What I Build
Custom websites, business web apps, SaaS MVPs, AI-powered tools, and digital identity systems.

Core Principles
Reliable architecture, clear UX, iterative delivery, and business-first engineering decisions.

ENGINEERING PHILOSOPHY

"Technology should serve a clear purpose: building reliable, scalable digital products that solve real problems."

The Power Triangle: IT infrastructure → Web engineering → Design → AI systems.

Professional Evolution

From early IT infrastructure to modern AI engineering. A continuous journey of stacking complementary skills to build complete digital products.

2010 — 2017 IT Foundations & Web Development	Began building websites and learning web technologies through hands-on experimentation and independent projects. Worked extensively with early PHP-based CMS platforms and web systems. **Technologies / Tools:** PHP, MySQL, HTML/CSS, JavaScript, CMS Platforms (PHP-Fusion, WordPress, Joomla) **Key Activities:** Building and maintaining websites; server setup and hosting environments; CMS customization and plugin integrations; database configuration and management. *This phase built a strong understanding of web architecture, hosting infrastructure, and backend logic.*
2017 — 2023 Graphic Design & Digital Product Design	Expanded skills into visual design, branding, and digital media production to support web projects and digital products. **Technologies / Tools:** Adobe Photoshop, Illustrator, Affinity Designer, UI/UX Layout Design **Key Activities:** Website visual layouts; brand identity design; logo and marketing material creation; digital graphics for online platforms; social media promotional visuals. *This design experience strengthened the ability to bridge design and development, enabling visually polished products.*

2023 — 2026 AI Engineering & Modern Development	Transitioned into modern development frameworks and artificial intelligence technologies, focusing on building intelligent software systems and AI-powered platforms. **Technologies / Tools:** TypeScript, Node.js, React, Next.js, OpenAI APIs, AI Agents, Automation Workflows, Prompt Engineering **Key Activities:** AI-powered applications; developer platforms and tools; SaaS web applications; automation systems for businesses. *This phase focuses on combining full-stack development with artificial intelligence to build next-generation digital products.*

Kurzprofil (DE)

Ich entwickle Websites, Web-Apps, KI-Workflows und Business-MVPs, die Kunden direkt testen können. Mein Fokus: robuste Architektur, klare UX und messbarer Geschäftswert.

KERNKOMPETENZEN

TypeScript, React, Next.js, Node.js, OpenAI APIs, Automatisierung, SEO & Analytics, Produktentwicklung.
